GLOBMETAL

QUALITY POLICY

Globmetal Kamil Pawlak's Quality Policy involves the provision and maintenance of comprehensive and high quality services ensuring continuous growth of profits and the development of the Employees and the Business.

Globmetal provides services in the field of metalworking (laser cutting, bending, welding, machining). We will tackle every challenge in the field of metalworking and other materials

Our quality policy is defined by the following lines of activities:

- we strive to continuously improve the satisfaction of our customers,
- we choose and train our employees so that their skills allow them to offer the highest level of service,
- continuous improvement of the effectiveness of the Quality Management System, providing services in a reliable, professional and timely manner and in accordance with the customer's requirements,
- taking care of the company's image
- building mutual trust in contacts with the customer through cooperation, protection of personal data and information as well as researching customer needs,
- introducing clear rules of operation within the company and in compliance with applicable legal regulations.

Implemented and continuously improved Quality Management System in accordance with the requirements of ISO 9001:2015, rich experience, modern machinery as well as compliance with applicable Labour, Safety and Hygiene Law as well as environmental protection, ensure the highest quality services.

Management provides means and resources to maintain and improve the Quality Management System. A constant element of the company's strategy is focusing the system on the expectations of its customers, maintaining business continuity and optimising business processes while maintaining confidentiality and integrity of information.

Globmetal Kamil Pawlak's quality policy is well known to all employees. Every employee is responsible for the quality of his/her work and is aware that it has an impact on the effectiveness of the company's services and customer satisfaction.
